

confidence through partnership. Making a promise into a guarantee of success.

»» Challenge is our motivation and customer satisfaction is our yardstick – based on openness, honesty and reliability. But it is only in conjunction with our experience and expertise that our customers’ worldwide projects become what they are: customized projects implemented under agreed conditions. For the market, we design machines and plants. For our customers, we create confidence.

Coperion is the worldwide market and technology leader in compounding & extrusion, materials handling and service – as well as being a partner for global corporations and small to medium-sized enterprises in the plastics, chemicals, food and aluminium industries. As an integrated technology provider, we use our comprehensive system and process expertise to implement individual solutions for compounding technology and bulk materials handling for our customers. This covers the full added value chain of the production process from

consultation and planning, through engineering, process optimization, manufacturing, delivery, installation and commissioning to our worldwide service network. We collaborate with our customers on innovative new and further developments of components, machines and systems, forming the basis for long-lasting, successful partnerships in which customer benefit is always to the fore together with efficiency, reliability and quality. **That’s what we mean when we say “confidence through partnership”.**

**Facts and figures**

Compounding systems installed worldwide	over 10,000
Bulk materials handling systems installed worldwide	over 8,000
Employees worldwide	over 2,100
Network of locations worldwide	27
Order intake	> 600 million Euro
Revenue	> 600 million Euro

➤➤ Project planning of compounding and bulk materials systems for manufacturing polypropylene in the United Arab Emirates ➤➤ Modernization of extruders for the plastics industry in Frankfurt, Germany ➤➤ Ship unloading of alumina and materials handling for a company producing aluminium in Dubai ➤➤ Service assignment for a food company in Houston ➤➤ Commissioning of a modular plant for engineering plastics in Shanghai ➤➤ Planning and implementation of the world's biggest PVC processing system in Brazil ➤➤ Analysis to increase the efficiency of a production plant in Japan ➤➤ Commissioning of an STS advanced compounder for making color masterbatches in the USA ➤➤ Training of employees on POM compounding lines in China ➤➤ Increasing throughput rates by modernization of a ZSK compounder in Brazil ➤➤ Delivery of hygienic components for the baby food production in Switzerland ➤➤ High clean application plants for producing XLDPE in Norway ➤➤ Service consulting relating to extruders, powder and pellet handling systems for processing HDPE in Russia ➤➤ Maintenance of a ZSK 18 laboratory twin-screw extruder in the Netherlands ➤➤ Installation of high-pressure rotary valves for conveying of PTA in Belgium ➤➤ ZSK MEGAvolume PLUS compounder for processing powder coating in Spain

»» Clear structures for fast, efficient and reliable solutions. The close cooperation of the three Coperion Competence Centers gives our customers the confidence of receiving the optimum solution for every project within the shortest possible time.

» **compounding & extrusion**

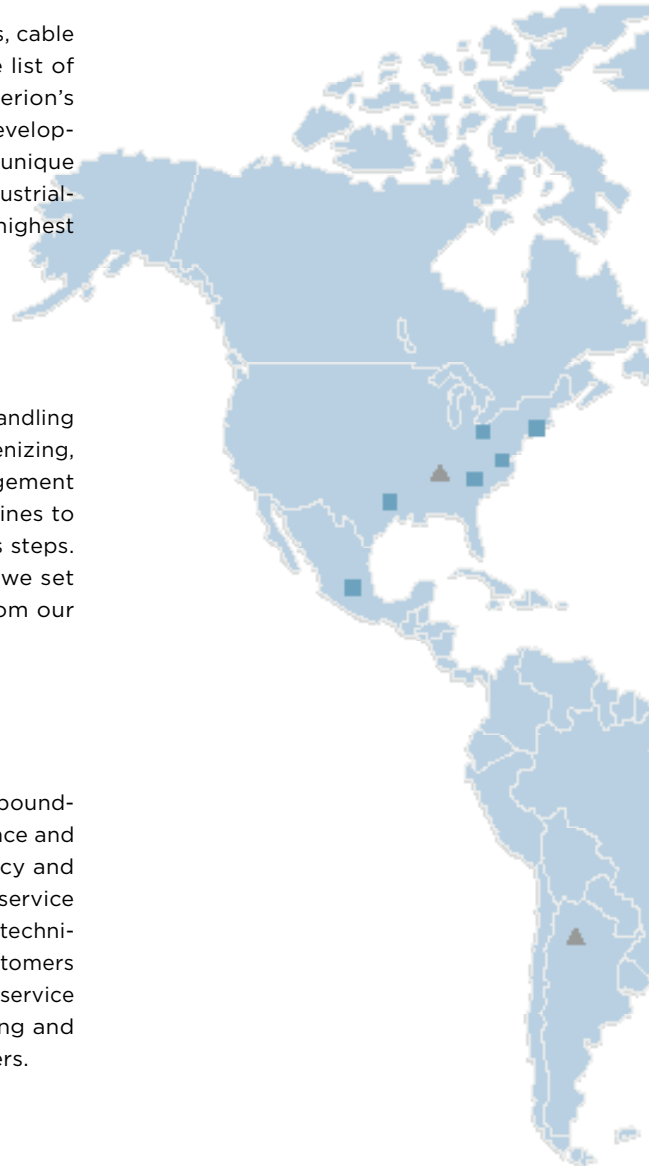

Toothbrushes, plastics parts in cars, powder-coated car wheel rims, wall plugs, cable insulations, shoe soles, sealants, window profiles, packing materials ... The list of ordinary everyday products whose raw materials were processed on Coperion's extruders or systems could be continued without end. As a pioneer in the development of the closely intermeshing, co-rotating twin-screw extruder, we have unique expertise. From special applications on a laboratory scale all the way up to industrial-scale production, we plan and implement individually-adapted systems with highest throughput rates at maximum efficiency for all compounding tasks.

» **materials handling**

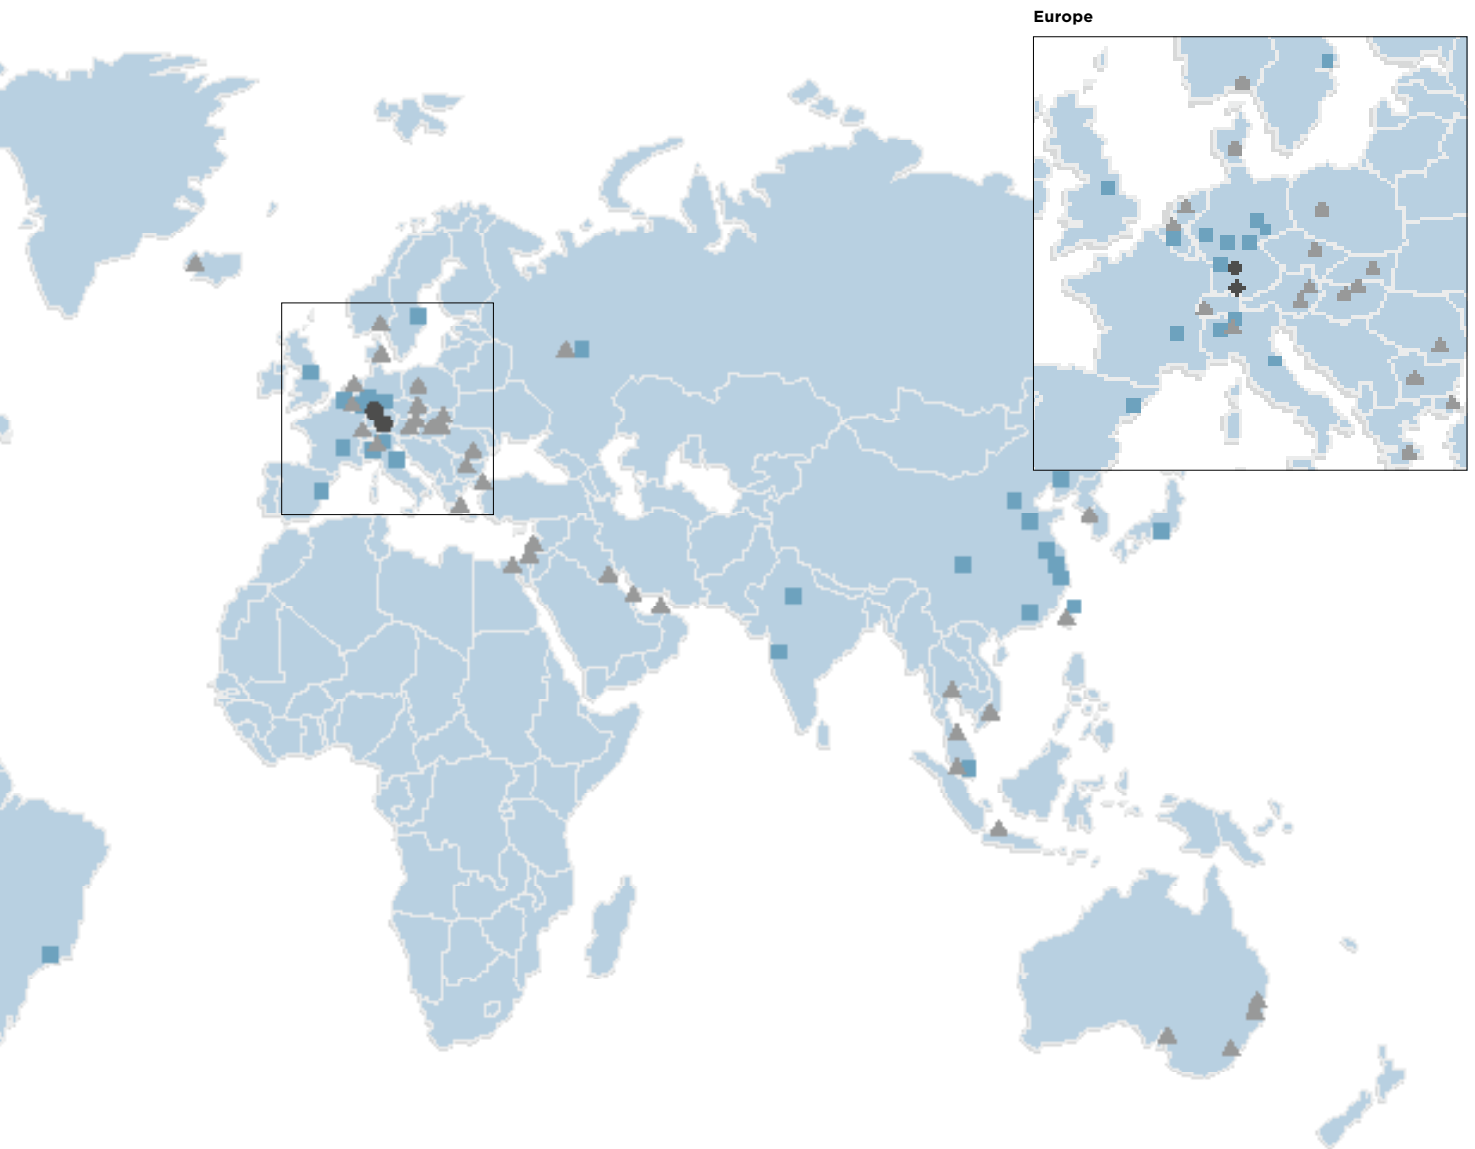

Hand in hand we create customized plants and sub-systems for treating and handling bulk materials. Quality is our benchmark when conveying, elutriating, homogenizing, storing, dosing or thermally treating powders and pellets. Our project management team has a broad engineering base with all the necessary specialist disciplines to react to specific requirements when realizing a system or individual process steps. Our intensive research into and development of new technologies means we set industry standards with innovative processes and process components from our own production.

» **service**

We understand that service for technically demanding products such as compounding or bulk materials handling systems is more than just a matter of maintenance and repair. We dedicate ourselves daily to demonstrating our reliability, efficiency and expertise to give our customers a competitive edge in difficult markets. Our service structure, consisting of 27 efficient service centers and more than 250 service technicians all over the world, enables us to act quickly and directly wherever our customers need us. Already during installation and commissioning of a machine or plant a service team is on-site. Maintenance, spare parts service, service consulting, training and modernization – we use our experience and expertise to benefit our customers.

**Wherever you may be, you will find us, too.** We think that being able to act quickly and expertly is also important for a good partnership. With our total of 27 locations and over 30 agencies around the globe, we have a network to ensure direct contact with our customers. Our specialists and local partners speak your language and are extremely familiar with local customs – because confidence is born when you understand your partner.
